Disclaimer

In considering these data please note that this information:

- Is an aggregation of student achievement information at one point in time
- Is aggregated across all learners and, therefore, does not indicate the extent to which a school is responding positively for the benefit of every learner.
- Cannot be used as a proxy for school quality or as the sole indicator of school performance because it does not tell you anything about the quality of teaching and learning in the school, and there are numerous variables that influence student performance
- Should not be used as a basis for ranking schools or as the sole basis for comparing schools as this would be misleading and potentially harmful.

Parents wanting to choose between schools or better understand the school their children attend, are advised to also:

- Read the relevant school Education Review Office reports found at: <http://ero.govt.nz/ERO/Early-Childhood-School-Reports>
- Talk to other parents who have children at the school
- Visit the school and engage in discussion with educators in the school using the full range of information available to them as the basis for these discussion.

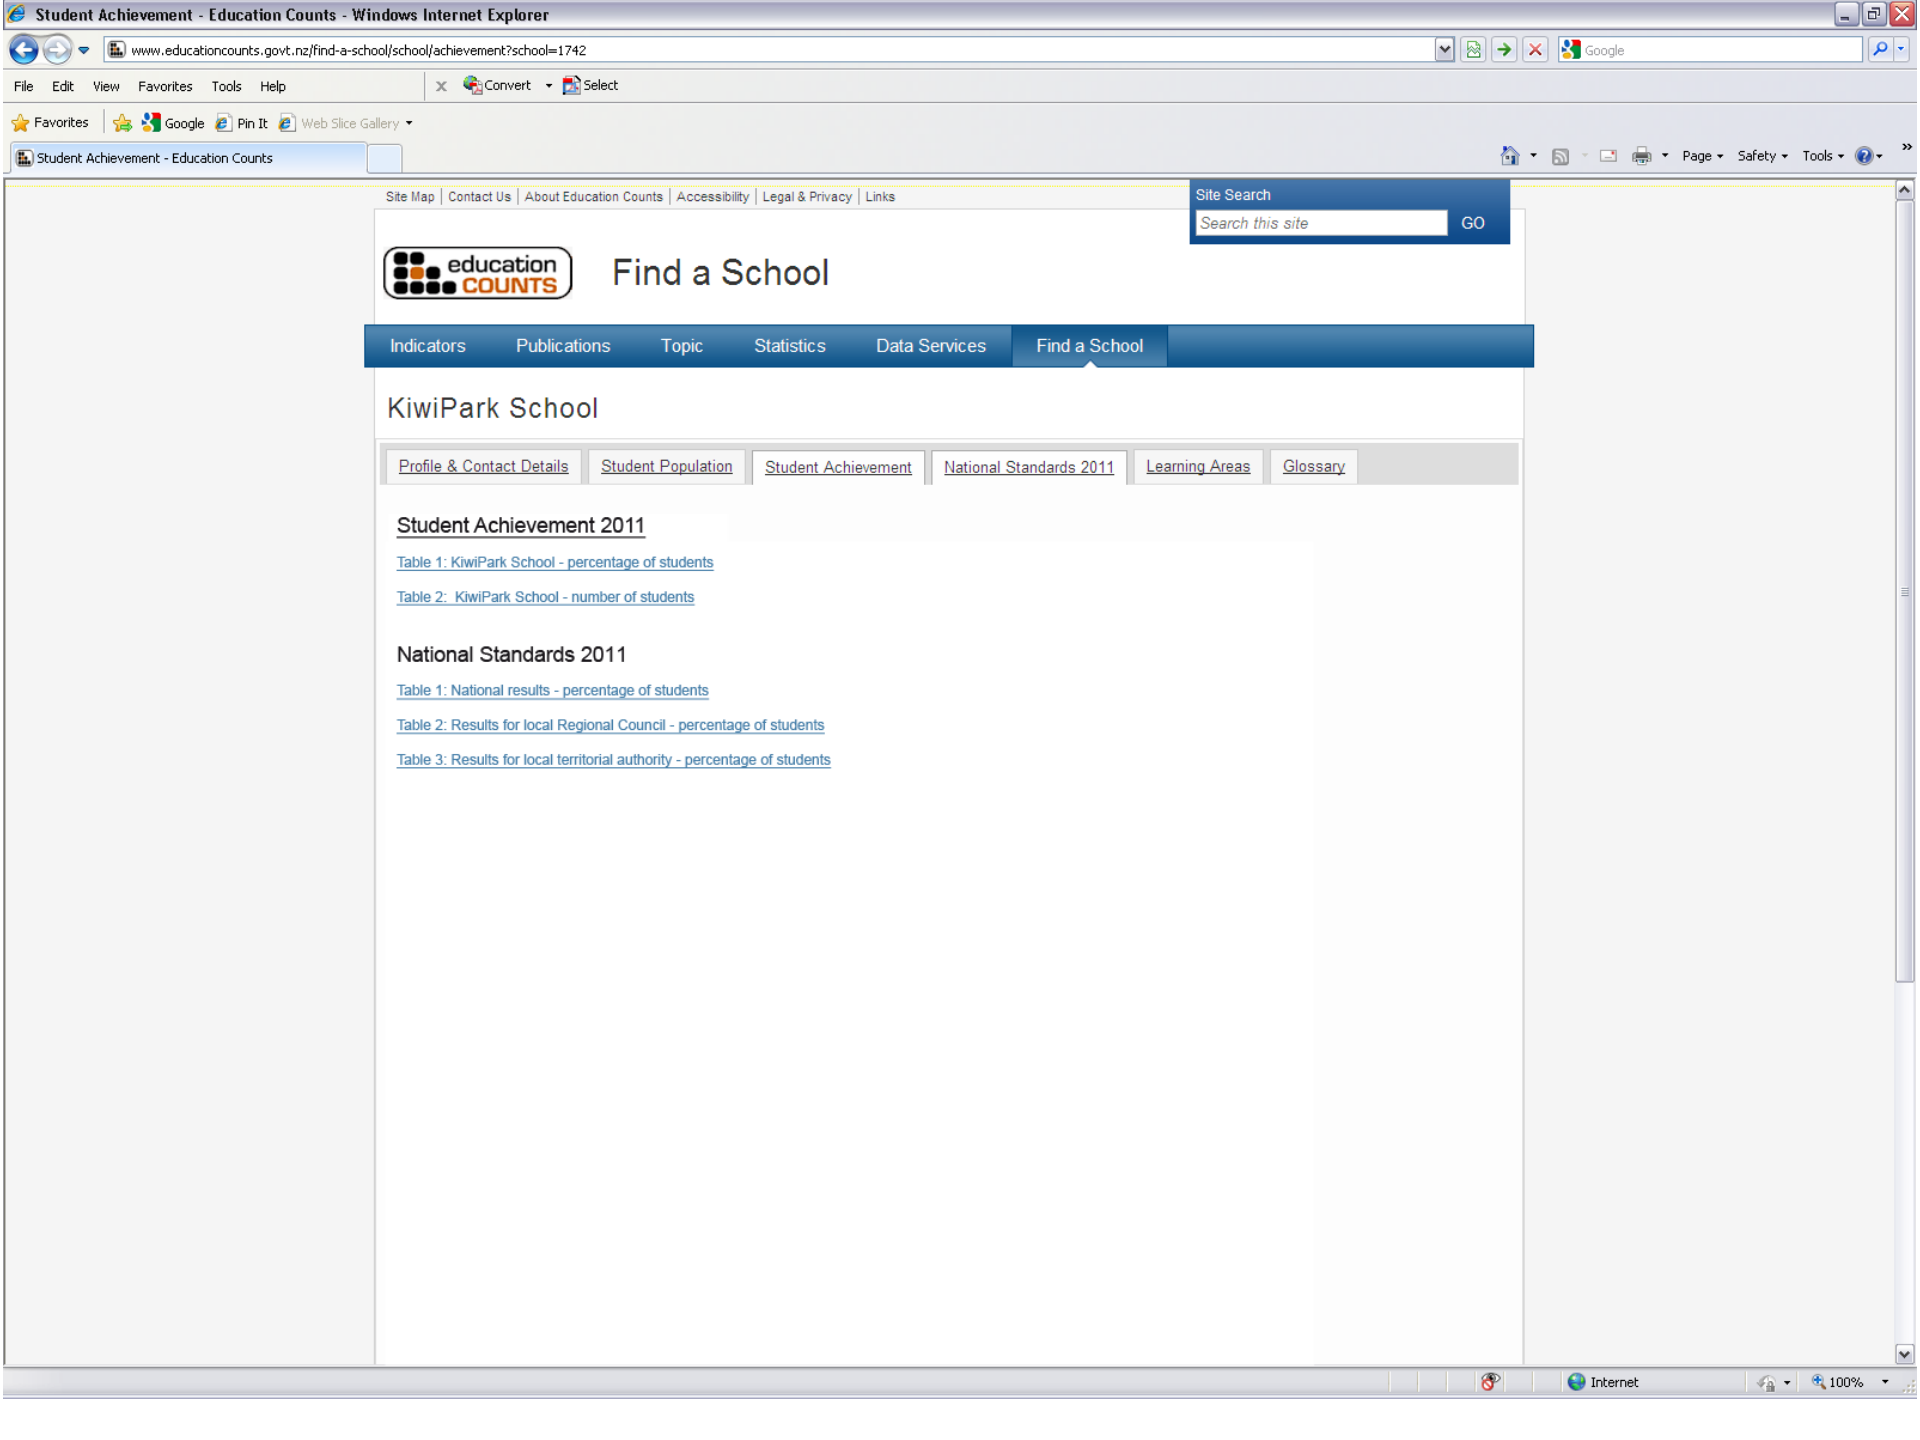

It should also be noted that the National Standards are relatively new and this is the first year in which this information has been required to be reported. The Ministry of Education is providing support to schools so that confidence and capability in using the standards is built. It has always been expected that the reliability of data will improve over time as they become embedded in school policy and practice.
